

Bt6 LED Black

■ Features ■

Lightweight Design

The light weight backing frame is both strong and easy to handle.

Sprung locking handles make screen construction a single person lifting operation at just over 8kg per panel.

The panel size of 576mm x 576mm means screens can be constructed quickly and safely whether flown, ground stacked or rigged as a ceiling.

Indoor / Outdoor

With over 65,500 levels of grey scale and a brightness of 1800nits combine to make this panel at home in any environment.

It has Ip43 protection means its happy indoors or outdoors with protection from rain.

High Refresh Rates

It's high picture refresh rates give you confidence with cameras for streaming and broadcast events.

■ Introduction ■

A robust and reliable panel for all events with a black faced LED for the cleanest images.

The Bt6 panels have been used on everything from WWE Wrestling, Vodafone and bands like Orbital.

Corporate events for Virgin group and brands including Harley Davidson and JEEP
